

Medicine Wheel Directions Activity (Kindergarten)

This printable pack includes:

- Coloring template of the Medicine Wheel with directions
- Movement direction cards for group activity
- Teacher instructions

Teacher Instructions

1. Begin by showing students a large Medicine Wheel and introducing the four directions: North (White), East (Yellow), South (Red), West (Black).
2. Use the included coloring sheet to help students label and color each direction.
3. Set up 4 areas of your room with color signs or floor markers.
4. Make direction movement cards to call out a direction (north, east, south and west) — students move to that area.
5. Add a movement or sound for each direction to reinforce learning.
 - North: Freeze like snow
 - East: Stretch like the sun rising
 - South: Wiggle or dance
 - West: Close eyes and take a breath like nighttime
6. Reflect together by asking questions: 'Which direction do you like best?' or 'What color is the West?'

Color the Directions of the Medicine Wheel

- North (White)
- West (Black)
- South (Red)
- East (Yellow)

Movement Activity

Place the directions cards around the room, or outdoors, and show the students where each direction is located. When students know the direction they are to go to, show them the movement they are to do when they get to that spot.

- Go to the North! Freeze like snow
- Go to the East! Stretch like the rising sun
- Go to the South! Wiggle or dance
- Go to the West! Close your eyes and breathe
